

ADITYA YADAV

AI/ML Engineer | Data Analyst | Python Developer

+91 7267001135 | itsadityayadav35@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer with hands on experience building projects and have a basic core application knowledge. Projects that include ml systems from RAG-based chatbot platforms using Python, Scikit-learn, and Lang Chain. Comfortable across the basic fundamentals of programming and basic AIML lifecycle: data preprocessing, model evaluation, prompt engineering, and some basics of SQL. Seeking an entry-level AI/ML Engineer or Data Analyst role to build scalable, real-world projects and focused on production grade systems.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, HTML, CSS

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS Concepts

ML & Evaluation: Scikit-learn, Model Evaluation, PyTorch

NLP & GenAI: RAG, FAISS, Sentence Transformers, Prompt Engineering

Tools & Workflow: Git, GitHub, Firebase, VS Code

PROJECTS

DocChat - AI Intelligent Document Q&A Chatbot

2026

- Indexed and retrieved answers from a 933-page, 4-document corpus (1,823 FAISS chunks) with 13.6ms average retrieval latency (p95: 18.3ms) across 30 test queries, using a RAG pipeline built on FAISS, Sentence Transformers, and Generative ai.
- Validated retrieval relevance through manual testing of 10 known-answer queries, achieving 10/10 relevant-passage recall within the top-3 results.
- Cut time to locate information in a 933-page corpus from an estimated 3–5 minutes to under 30 seconds (~6–10x faster), via a full-stack Flask + LangChain application with incremental indexing.

BachatAI - AI-Driven Personal Finance Management System

2025

- Trained and evaluated an ML-based recommendation model on a Kaggle dataset of 100,000+ transactions across 100+ users over 12 months, achieving ~87–90% accuracy on budgeting and savings recommendations.
- Built a dashboard tracking 6 financial categories salary, investments, rent, loans, fees, and daily expenses surfacing income and spending trends through interactive visualizations.
- Integrated an NLP-based chatbot to handle natural-language financial queries within the dashboard interface.

Airbnb Open Data Analysis

2025

- Analysed 100,000+ Airbnb listings using Python and Pandas, building a complete pipeline covering cleaning, EDA, and visualization to surface pricing, neighbourhood, and host-level trends.
- Found only a weak correlation ($r = 0.14$) between host listings count and availability, challenging the assumption that larger hosts operate with proportionally more open inventory.
- Developed regression and ensemble-based models to forecast listing price and occupancy trends.

EXPERIENCE

Netflix Content Trends Analysis | AICTE VOIS Internship

Aug 2025 – Oct 2025

- Analysed 7,700+ Netflix titles across 60+ genres using Python and Matplotlib, and produced 5 visual analyses (content-type split, yearly trends, top genres, top countries, top ratings) to surface content strategy patterns across top-performing markets.

Android Development with Core Java | NetCamp

Sep 2024 – Oct 2024

- Developed 5+ Android applications using Core Java, optimizing code and API calls to increase performance by 30%.
- Integrated Firebase for real-time data sync across app sessions, replacing local-only storage with persistent, always-current data.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML)

2023 – 2026

United College of Engineering and Research | CGPA: 7.48

Diploma in Information Technology

2020 – 2023

Handia Polytechnic, Handia | 76%

CERTIFICATIONS

- Introduction to Data Science — Infosys Springboard
- Introduction to Machine Learning — NPTEL
- AI and Cybersecurity Awareness — TCS iON
